

THE ART OF GOLDEN REPAIR

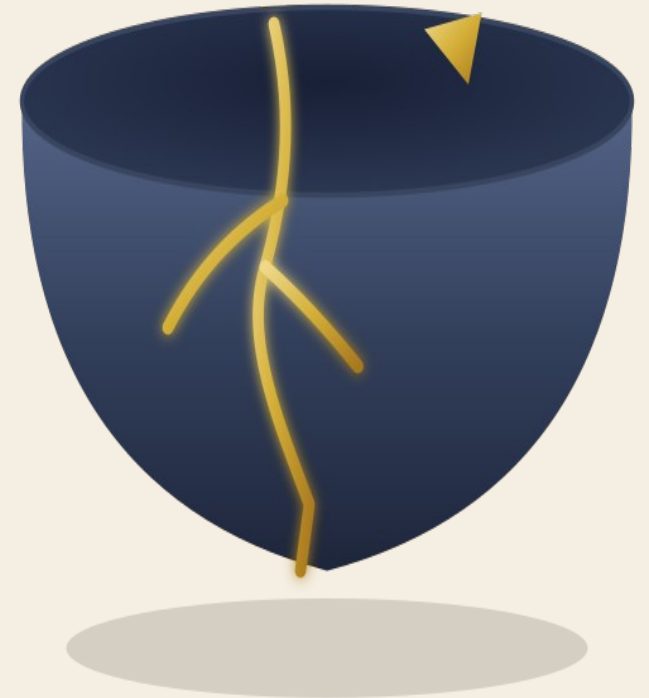

Tsugumi 継美

継 mend • carry on 美 beauty

See your broken piece reborn in gold —
before you ever repair it.

THE PROBLEM

A 400-year-old craft is running out of hands.

Kintsugi's masters are few, and aging. Real repair is slow and costly — so people bin broken pieces instead of mending them, and every repair that doesn't happen is work an artisan never gets.

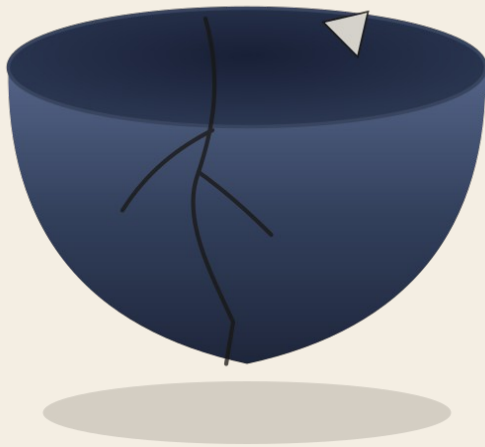

For the craft to survive, its artisans need demand — and people need an easy reason to choose repair over the bin.

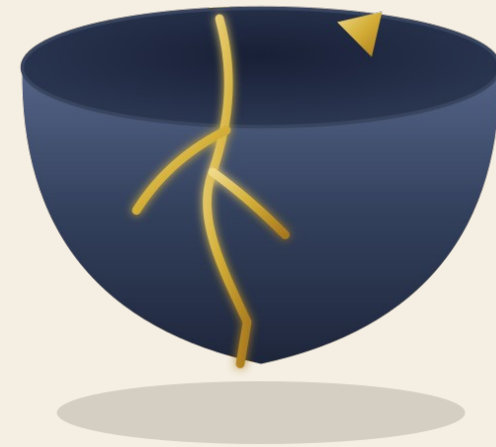

TSUGUMI

Upload the break. See it reborn.

One photo of your broken dish in; a faithful, photorealistic vision of it repaired in gold out — the same piece, now with a golden history.

Before

After

Seeing the result first is the nudge to save the piece — and to book the artisan who can make it real.

It won't gild what can't be mended.

Not a dish

It declines, and tells you why.

Not truly broken

Nothing to mend — so it won't pretend.

Plastic or unrepairable

It says so, honestly.

Never reinvents

Your design stays yours; it traces the real cracks.

The limits are the point — honest gold you can trust.

THE BUSINESS MODEL

We earn only when artisans earn.

1

Free to preview

Seeing your piece reborn costs nothing. The preview is the hook that creates demand for real repair.

2

Booked to a studio

We match the piece to a vetted kintsugi studio — with return shipping, an estimated total and a finish date.

3

A small cut

Tsugumi takes a small commission on each completed repair. No repair, no fee — our incentives track the artisan's.

Aligned by design: a marketplace where our growth is the artisans' growth.

BUILT ON THE PARTNER STACK

Production-grade, deployed live.

Qwen Cloud

USED

Qwen-VL is the vision + validation brain — it reads the object, its material, and exactly where it's broken.

GMI Cloud

USED

One unified API routes the vision and image-generation models, so the whole agent runs and ships live.

Qoder — what we planned. We wanted Qoder's Expert Panel Mode to build faster and go further — but our credits never arrived, so we shipped Tsugumi without it.

壊れても、また美しく。

Broken, yet beautiful again.
